

Ed Freeborn
Senior Analyst
National Law Enforcement & Corrections Technology Center, Northeast
(NLECTC-NE)

Mr. Freeborn has been providing technical assistance to state and local law enforcement for the National Law Enforcement and Corrections Technology Center, Northeast (NLECTC-NE) in Rome, NY since 2002.

The NLECTC-NE is a program of the National Institute of Justice, the Science and Technology Arm of the Department of Justice. An important part of his work includes support for US/Canadian Integrated Border Enforcement Teams (IBET), part of the Smart Border Action Plan.

Mr. Freeborn has been involved with the NY State GIS Coordination program since 1996 including participation on the GIS Standards and Data Coordination Work Group. He is also currently supporting the Federal Geographic Data Committee's Homeland Security Work Group's activities, and the Homeland Infrastructure Foundation Level Database Work Group (HIFLD-WG) which is hosted by the Office of the Assistant Secretary of Defense for Homeland Defense.

Mr. Freeborn received his BS in Math from Ohio University and did his Graduate Coursework in Photogrammetry and Remote Sensing at State University of NY, College of Environmental Science and Forestry (SUNY-ESF)
