

**Mario Saucier**  
**Chief, Security Technology**  
**Transport Canada, Security and Emergency Preparedness Directorate**

Mr. Saucier is the Chief, Security Technology in the Security and Emergency Preparedness Directorate of Transport Canada.

Mr. Saucier is a graduate in Avionic Technology Systems. He holds certification on Boeing 737 Electrical and Systems and Fairchild Aircraft FH-227 from the private sector.

Mr. Saucier joined the public sector in 1982 and held various positions in the fields of Airspace Flight Inspection and Standards development for Global Positioning Systems and Wide Area Augmentation Systems, and also auditing and inspection of Air Navigation Systems.

More recently he joined the Security Technology Branch, where he is responsible for the development and implementation of transportation security performance standards and research programs for all modes of transportation.
